ABOUT KATCH INVESTMENT GROUP

Katch Investment Group is a dynamic asset management boutique offering innovative investment solutions in a constantly changing and challenging financial market environment. In the aftermath of the global financial crisis, major central banks' liquidity injections have inflated traditional asset classes, while new regulations reduced the banks' appetite and capability to lend to smaller businesses.

Laurent Jeanmart, CFA
Chairman

Katch identified these trends and decided to launch a fund that invests in short-term lending and financing opportunities. It focuses on areas where the capital supply is scarce that offer relatively high and stable returns for investors, such as factoring, receivables monetization and real estate bridge loans.

Pascal Rohner, CFA
CIO

The fund is registered in Luxembourg and partners with recognized financial institutions. It is managed by Stephane Prigent (Ex-Managing Director & Global Head of Equity Sales Research at State Street Capital), Laurent Jeanmart (Ex-head of Investment at Platinum Capital & Ex-CIO at Fidelis Insurance Holdings), and Pascal Rohner (Ex-CIO at Private Investment Management & Ex-Credit Suisse).

The fund targets a total return of 6.5% in USD, with a dividend of 6% p.a. paid on a quarterly basis, for the distributing share class.

PORTFOLIO OVERVIEW

As of the end of September, the portfolio remains well diversified with exposure to factoring in Brazil, as well as bridge financing in Germany and the United Kingdom, amongst others.

MARKET OVERVIEW

Stock markets have rebounded sharply, driven by the unprecedented monetary and fiscal stimulus. The S&P 500 surged 50% from its March lows until late August. Historically, September has been one of the worst months for equity investors – and this year was no different. September broke the 5-month market rally. The S&P 500 corrected 4% and the NASDAQ was down around 5%.

Normally, the diversification between stocks, bonds and commodities help to minimize volatility. But in September, several asset classes fell in tandem. US Treasuries had a negative return and gold prices fell more than 5%, for example. Sure, a month alone does not change the investment paradigm, but it seems logical that liquid asset classes that have been inflated by aggressive monetary stimulus can no longer protect against future equity sell-offs.

While the September correction was shallow and short-lived, it was another indication why investors should further diversify their portfolio including alternative asset classes.
